ABSTRACT

The "TRAINING MANAGEMENT SYSTEM" is a system software specially for trainer information maintenance and assessment evaluation. In the existing system, all the activities are done manually and it is time consuming. It is very difficult for both the trainer and trainee to maintain their records by paper documentation because there may be many updates in his career and for each update either he needs to create a new document or overwrite the existing one which seems clumsy and also there are possibilities it may be lost and get damaged over periods of time. The proposed system is used by companies to maintain the records of trainee's easily.

The creation and management of accurate, up-to-date information regarding trainee's assessment and personal details are critically important in the companies. TRAINING MANAGEMENT SYSTEM deals with trainer personal details, trainee personal details, assessment details, assessment evaluation details and trainer comments. This system loosens their efforts by providing a web application which provides a user-friendly user interface to the trainer to update and maintain the trainee information right from their evaluation comments. The project allows only authorized access to users with a password. Trainee can view their assessment details that is evaluated by the trainer. The system has a feature of that a trainee can view only their details, they can't able to view the other trainee evaluation status, so it improves the security. Admin is the only user can able to register the both trainee and trainer details.

ACKNOWLEDGEMENT

First and Foremost, we acknowledge the abundant grace and presence of God Almighty throughout different phases of the project and its successful completion.

We wish to express our extreme gratefulness to our beloved Correspondent **Thiru.A.VENKATACHALAM B.Sc.**, and all the trust members of Kongu Vellalar Institute of Technology Trust for providing all the necessary facilities to complete the project successfully. We express our deep sense of gratitude to our beloved Principal **Prof.S.KUPPUSWAMI B.E., M.Sc (Engg)., Dr.Ing (France).,** for providing us an opportunity to complete the project

We express our deep gratitude and respect to our Head of the Department **Dr.R.R.RAJALAKSHMI M.E., Ph.D.**, whose knowledge expertise and professional Management style invigorated a firm attitude to carry out our work. We are thankful to our project coordinator **Mrs K.S KALAIVANI M.E**, Assistant Professor, for their valuable guidance and support to complete our project successfully.

We are highly indebted to **Mrs. VANI RAJASEKAR M.E.**, Department of Computer science and Engineering for her valuable supervision and advice for the fruitful completion of the project and we are thankful to all the faculty members of the Department of Computer Science and Engineering for their valuable guidance and support.
